Subject: *SMOKING DEATHS BY STATE AND COUNTY*

This is a supplement of my memorandum of July 7, 1994 (attached) regarding above mentioned subject.

I came across the attached chart from the 1975 HEW ATLAS OF CANCER MORTALITY. It is fascinating to see the concentration in the Texas and Louisiana area, where the petroleum chemical plants are, and in the Jacksonville area where the refineries and atomic weapons plants were. Also, Jersey with its heavy concentration of refineries.
